### Outlook bleak for passing CES, repealing oil subsidies

The chairman of the Senate Energy and Natural Resources Committee is casting doubt on prospects for President Obama's proposed "clean energy" standard that would require utilities to source a certain percentage of their electricity from renewable sources by 2035. New Mexico Democrat Sen. Jeff Bingaman also said a bill headed to the Senate floor this week that would ax tax breaks for the largest oil companies is certain to fail. "The environment is a difficult one to get anything passed in," Bingaman said on C-SPAN's "Newsmakers" program that aired yesterday.

Bingaman said he and the panel's ranking member, Sen. Lisa Murkowski (R-Alaska), are still sifting through some 300 responses they received last month in response to a "white paper" they released probing the issue of a clean energy standard (CES). "We're now trying to figure out if we can put together a draft piece of legislation that could get enough votes to be seriously considered in our committee," Bingaman said. "We don't have the answer to that yet, but we're trying in a conscientious way to get to something that would achieve the kind of objective the president laid out."

In his State of the Union address earlier this year, Obama called for an 80 percent clean energy standard by 2035. In a shift from previous Democratic calls for a renewable-only energy standard, the president said his standard could include nuclear energy, natural gas and coal with carbon capture and sequestration. But despite the gesture, no Republican has endorsed the proposal. Murkowski is working with Bingaman on the white paper, but she has not agreed to sign onto a bill if one is introduced. And the measure faces tougher battles beyond the Energy and Natural Resources Committee.

### Extended Temp Forecast: Chicago Area

Tue	Wed	Thu	Fri	Sat
59 - 86	60 - 78	61 - 75	66 - 84	59 - 81

### Electricity Pricing Areas – On Peak July 2011

	May 31, 2011	Per kWh
<b>Cinergy</b>	<b>Hub Peak Swap Monthly</b>	<b>\$.04734</b>
<b>PJM Hub</b>	<b>Electricity Monthly</b>	<b>\$.06181</b>
<b>PJM</b>	<b>No. Illinois Peak LMP</b>	<b>\$.05068</b>
<b>PJM</b>	<b>Western Peak LMP</b>	<b>\$.06181</b>

### ComEd Average Day Ahead LMP Electric Price

Time Period	Average per Kwh
<b>Jun 1- Jun 30, 2010</b>	<b>\$.04184</b>
