

Volume 374 April 28, 2011

Market May natural gas futures expired Wed at \$.4377 per therm; June is now the front month. Natural gas traded mixed to higher this week as dollars continue into the commodity markets and prices are supported by colder than normal weather in the north. Crude oil and other energy liquids are influenced higher by the unrest in the Middle East. Gas production levels due mostly to on-shore shale drilling are causing an over-supply condition; gas is now being exported as LNG. Industrial demand is recovering slowly. Natural gas is attractive to fix at this time to protect this year and beyond. The North American rig count is 878 this week. After a rise in count starting a year and a half ago the rig count has leveled off and decreased 7 this week.

The Crude oil price for June is higher this week at \$112.92 per barrel. Heating oil is higher at \$3.24 per gal. Unleaded gasoline futures are higher this week at \$3.45 and gasoline at the pump is around \$4.15...in Indiana. The natural gas storage report today was an injection of 31 BCF. Storage is 215 BCF lower than last year and 11 BCF lower than the 5 year average.
