

# Rhode Island Environmental Disclosure Label for Electricity Services Provided by Nordic Energy Services, LLC

*Nordic Energy Services, LLC reports to its customers fuel sources and emissions data provided by New England Power Pool Generation Information System (NEPOOL GIS), the local regional transmission organization. The following distribution of energy resources was used to produce electricity in the NEPOOL region, and represents all resources used. All fuel mix and emissions data are calculated from NEPOOL System Mix. The sum of the individual fuel sources may not equal 100% due to rounding.*

**AIR EMISSIONS FROM POWER SOURCES**

*The air emissions listed below are produced when certain fuels are used to generate electricity. Carbon Dioxide (CO2) is a "greenhouse gas" which may contribute to global climate change. Sulfur Dioxide (SO2) and Nitrogen Oxides (NOx) released into the atmosphere react to form acid rain. Nitrogen oxides also react to form ground-level ozone, an unhealthy component of "smog".*

Air Emissions	Pounds Emitted per Megawatt Hour of Electricity Generated
Carbon Dioxide (CO2)	630.354 lbs
Nitrogen Oxides (NOX)	0.501 lbs
Sulfur Dioxide (SO2)	0.200 lbs
